WATER STORAGE TANKS

LAYERS

Black Layer Provide
Uv Protection

Sky Blue Layer for
Better Visibility

DOUBLE LAYER

SKY CLASSIC

SKY TUFF

Sky Classic (Double Layer)

Sky vertical storage tanks are free standing plastics tanks that are ideal for storage of portable drinking water, rainwater harvesting/collection, home emergency water storage, farm irrigation fire suppression. This product is manufactured from food grade polyethylene with UV inhibitors which protect the liquid contents from the direct sunlight, making it ideal for both indoor and outdoor use. A concrete pad is recommended for installation. However tanks may be placed on any flat level "compacted" surface. These tanks come in 2 layers with inner layer Light Blue & outer layer black.

Unique Features

- UV Stabilized
- Excellent impact resistance.
- Light weight and heavy strength.
- Leak proof and rust proof.
- 100% Maintenance Free.
- Offers guaranteed actual storage volume

Sky Tuff (Extra Strong)

Sky Tuff is made of premium-grade LLDPE using high-quality polyethene. It is highly durable, light in weight requires less maintenance, non-corrosive, and are suitable for use in a bio-hazardous environment. They find application in various industrial process or storing highly corrosive chemicals. These tanks are manufactured using high quality raw materials and appreciated for their robust construction, accurate dimension and long service life. It is available in different capacities to meet the diverse needs of the clients.

Unique Features

- UNBREAKABLE: It go through very tight and hard tests such as drop test and hammer test
- 100% UV Stabilized Tank and Main-layered Lid: Sun rays cannot reach the water, no algae formation.
- Threaded Lid: Air tight threaded lid to prevent dengue & malaria mosquitoes and other insects
- Multi-Ribbed Design: Ensures long-lasting strength & durability.

Sky Dynamic (Triple Layer)

Sky Triple Layer Vertical storage tanks are made with three layers to make the tank sturdier and useful than ever before. Each layer of the Sky Triple Layer Tank serves a different purpose –

- Outer Layer which is coloured is UV stabilized which minimizes heating of water by sun's rays.
- Middle Layer is made of high quality carbon black and it provides complete protection against UV rays of sun and increases tank life.
- Inner Sky blue Layer is FDA approved food-grade material, ideal for storing drinking water, while the white colour provides better visibility.

Unique Features

- Manufactured from food grade raw material
- 100% UV stabilised
- Tanks are highly durable
- Heat resistant
- Corrosion resistant
- Maintenance free
- Easy to install and handle
- Offers guaranteed actual storage volume.

Sky Pure (Antimicrbial)

Sky pure vertical storage tank comes with anti-microbial technology against bacteria,virus, fungi and algae remains active 24/7 keeping the water tank hygienically cleaner and fresher. It is more durable, easier to keep clean and less likely to break under recommended usage condition. The antimicrobial protection infused into the product helps to prevent the proliferation of product damaging microbes that may otherwise shortens its lifespan.

Unique Features

- Proven to harbour up to 99.9% less bacteria
- More hygienic to use
- Easy to clean and stay cleaner in-between cleaning
- Less likely to facilitate cross-contamination from surface to surface
- Resistant to staining and bad odours
- More durable and unlikely to crack or break under recommended usage conditions
- Helps to maintain the purity of water stored in the tank by minimizing the risk of bacterial cross-contamination.

FIVE LAYER

Sky Nova (Puff)

Sky nova vertical storage puff tanks come with four layers which are best in class. They are highly appreciated in the market for its quality of insulation, strength, durability & optimum price. Poly Urethane foam to create heavy insulation backed up by a carbon black UV protecting layer. This configuration helps to retain the water temperature as it is, when the environmental temperature even crosses 44-45 degree centigrade.

Unique Features

- Manufactured from 100% virgin raw material – promises superior quality and long-lasting performance
- Thermally insulated using foam (four layered variety) – keeps the inside water cool in summer and reasonably warm in winter time.
- Most Suitable for Drinking Water due to use of food grade plastic
- Full Capacity Guaranteed
- Easy Installation
- UV Stabilized
- Strong & Durable

Sky Cool (PU Insulated)

The Sky Cool range of 5-layer plastic water tanks has been designed to keep water temperature maintain during summer and winter. These tanks consist of 5 layers, where each layer is designed to fulfill a specific purpose. The first layer is the reflective shield, the second layer (which is the first foam layer, provides insulation.) The third layer provides UV shielding, followed by another foam layer that provides even better insulation. The final, inner layer is FDA approved food-grade material, ideal for storing drinking water, while the white colour provides better visibility. Its heavy, threaded lid is very durable and keeps the water safe from dust or pollutants. The lid is made out of LLDPE through the process of Roto moulding. The moulding process and the material used, together make the lid of the overhead tank very sturdy. Its heavy, threaded lid is very durable and keeps the water safe from dust or pollutants.

Unique Features

- Roto Moulding Manufacturing Process: Provides flexibility to take care of cyclical expansion and contraction due to temperature changes and filling/refilling of tank.
- Maintain Temperature - Foam keeps water cool during summer and lukewarm in winter
- PUFF Insulated Lid – It comes with puff insulated lid which enhance its temperature maintaining capability
- Threaded LID - Ensures the water is always dust-free and hygienic. It also has inner lid to provide protection from sunlight and keep the water safe and algae free.
